

Fields of Work – *Andreas Wollbrink*

- MEG Engineer
- Research Lab Project Manager
- Neuroscience Software Developer

- Operation and Maintenance of electro-physiological (MEG, EEG, tCS, TMS) and behavioral Research Laboratory Equipment (recording and stimulation devices)
- Cryogenic Engineering (helium recovery, helium liquefier, helium refills)
- Technical Support and Teaching regarding to Experimental Design, Setup and Accomplishment of Neurophysiological MEG and EEG Studies (stimulation, data acquisition and data analysis)
- Neuroimaging Method Development
- Supervision of Students

- IT-Administrator (IT infrastructure maintenance and network administration)
- Local Data Security Engineer
