

Dear colleagues,
Dear students,
Ladies and Gentlemen,

We would like to cordially invite you to the Epidemiology seminar series, which will be offered in the winter semester with a content focus and a methodological focus in the summer semester at the Institute of Epidemiology and Social Medicine.

In this seminar series, the following experts will give lectures with subsequent discussion:

| | | |
|------------------------------------|---------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 10.10.2023², 4pm | Prof. Jack Bowden (University of Exeter) | Using genetics and routine data for causal triangulation in cardiometabolic health research |
| 17.10.2023², 1pm | Prof. Keith Humphreys (Karolinska Institute) | Tumour growth models for the analysis of breast cancer screening data – studies of aggressive breast cancer and screening performance |
| 09.11.2023², 4pm | Prof. Erin Gabriel (University of Copenhagen) | A collection of surprising misunderstandings and incorrect conventional wisdom in causal inference: from dichotomizing confounders to adjusting for residual confounding in double robust estimates, the things we think we know and are wrong about. |
| 06.12.2023¹, 3pm | Prof. Yinghui Wei (University of Plymouth) | Patient characteristics associated with clinically coded long COVID: an OpenSAFELY study using electronic health records |

¹This appointment is implemented exclusively via Zoom (see below).

²This event takes place on a hybrid basis: In addition to attendance, which is limited by the number of places in the seminar room, it is also possible to participate via Zoom (see below).

Zoom:
