

1995

1. Hirsch J, Schlatter E. K⁺-channels in the basolateral membrane of rat cortical collecting duct are regulated by a cGMP-dependent protein kinase. *Pflügers Arch*, 1995;429:338-344
2. Bleich M, Köttgen M, Schlatter E, Greger R. Effect of NH₄⁺/NH₃ on cytosolic pH and the K⁺-channels of freshly isolated cells from the thick ascending limb of Henle's loop. *Pflügers Arch*, 1995;429:345-354
3. Kleta R, Mohrmann M, Schlatter E. Effects of cell differentiation on ion conductances and membrane voltage in LLC-PK1 cells. *Pflügers Arch*, 1995;429:370-377
4. Hirsch J, Schlatter E. K⁺ channels in the basolateral membrane of rat cortical collecting duct. *Kidney Int*, 1995;48:1036-1046
5. Kleta R, Hirsch J, Heidenreich S, Schlüter H, Zidek W, Schlatter E. Effects of diadenosine polyphosphates, ATP and angiotensin II on membrane voltage and membrane conductances of rat mesangial cells. *Pflügers Arch*, 1995;430:713-720
6. Schlatter E, Ankorina I, Haxelmans S, Kleta R. Effects of diadenosine polyphosphates, ATP and angiotensin II on cytosolic Ca²⁺-activity and contraction of rat mesangial cells. *Pflügers Arch*, 1995;430:721-728
7. Schlatter E, Haxelmans S, Ankorina I, Kleta R. Regulation of Na⁺/H⁺ exchange by diadenosine polyphosphates, angiotensin II and vasopressin in rat cortical collecting duct. *J Am Soc Nephrol*, 1995;6:1223-1229
8. Kleta R, Cermak R, Hirsch J, Schlatter E. Effects of diadenosine polyphosphates on membrane voltage and membrane conductances of rat mesangial cells. *Nieren Hochdruck*, 1995;24,410-411
9. Ankorina I, Kleta R, Haxelmans S, Schlatter E. Effects of diadenosine polyphosphates on cytosolic Ca²⁺ activity in rat mesangial cells. *Nieren Hochdruck*, 1995;24,408-409
