

Julia Schreitmüller completed her Bachelor of Arts (B.A.) in cultural studies at the University of Marburg as well as her Master of Science (M.Sc.) in psychology at the University of Würzburg. Besides gender issues her research interests cover anxiety, depression and coping with somatic diseases. Her interest in both, genderstudies and clinical psychology lead her to Prof. Dr. Dr. Bettina Pfleiderer, who is head of the workgroup "Cognition & Gender" of the Westfälische Wilhelms-University Münster. Since March 2016 she is working on the content design of the current project "Development of an open exchange platform - GenderMed-Wiki".
