

WWU
MÜNSTER

3rd Münster Symposium on Infection Biology

March 13 - 14, 2019

Max Planck Institute for Molecular Biomedicine, Münster

Melanie Brinkmann, Braunschweig

"Meticulous and multifaceted: How herpesviruses fine tune the innate immune response"

Petra Dersch, Münster

"Remodelling *Yersinia*-host interactions: For better or worse?"

Michael Hensel, Osnabrück

"Cellular and molecular approaches to the intracellular lifestyle of *Salmonella enterica*"

Eva Herker, Marburg

"Lipids go viral: deciphering the function of lipid droplets in HCV infection"

Mathias Hornef, Aachen

"Ontogeny of the intestinal host microbial interaction"

Florian I. Schmidt, Bonn

"Interrogating infection and immunity with camelid nanobodies and other protein-based tools"

**Participation
is free!**

Please register until March 1, 2019 for participation as well as for oral and poster presentation on our conference website:
